Important points

- ☞ Please bring back all the polythene materials you take in
- ☞ Dump the garbage in bins
- ☞ This island is a habitat for pigeons and they build their nests here. Do not conduct yourself in a manner disturbing this process
- ☞ Crows are perilous to pigeons. Please refrain from feeding the crows on the island. Let photographs be your memory of your visit to the island rather than the parts of the coral reefs of the island

Pigeon Island Marine National Park is situated in Trincomalee district off Nilaveli beach. The island is situated in the Indian Ocean two kilo meters away from the shore. The island consists of two islands and a set of coral reefs. The island had been declared as a conservation in 1963. Subsequently the island was declared as an area open for public visit by a special gazette notification number 1291/16 of 2003. The extent of the island is 471.429 hectares. The island is maintained by Wild Life Conservation Department and protected by the provisions under the Ordinance of Wild Life and Flora Conservation. The bio diversity of the coral reef of the island and the island being a habitat for pigeons are the reasons for the importance of this beautiful location. There are around 100 types of coral reefs and 178 species of fish on this island.

Maintain the balance of the boat while being seated.
Do not rise from your seat for any reason after the
boat has started the journey. Hold the handles tightly
during the ride to the mid ocean and to the shore.
Do not get panicked when the waves rise. The boatmen
are experienced to handle any untoward situations.
